

## Nomenclature: Sample ID

1\_5\_17\_1

- Core Experiment: Current Core Experiment number, in our case this is the first core experiment, so number 1.
- Replicate: current replicate, labeled from 5 until 7. See the schedule for exact number.
- Sample: the current timepoint. Controle is 1 until 10, treatment is 11 until 20. e.g.

|                                  |                  |    |
|----------------------------------|------------------|----|
| <b>Replicate 6 (Fermenter 2)</b> |                  |    |
| <b>Wednesday, Nov 3</b>          | <b>Con</b>       |    |
| <b>(LL-LL)</b>                   | 9.00 (-60)       | 1  |
|                                  | 10.00 (0)        | 2  |
|                                  | 10.05 (5)        | 3  |
|                                  | 10.10 (10)       | 4  |
|                                  | 10.20 (20)       | 5  |
|                                  | 10.40 (40)       | 6  |
|                                  | 11.00 (60)       | 7  |
|                                  | 12.00 (120)      | 8  |
|                                  | 14.00 (240)      | 9  |
|                                  | 18.00 (480)      | 10 |
| <b>Friday, Nov 5</b>             | <b>Treatment</b> |    |
| <b>(LL-HL)</b>                   | 9.00 (-60)       | 11 |
|                                  | 10.00 (0)        | 12 |
|                                  | 10.05 (5)        | 13 |
|                                  | 10.10 (10)       | 14 |
|                                  | 10.20 (20)       | 15 |
|                                  | 10.40 (40)       | 16 |
|                                  | 11.00 (60)       | 17 |
|                                  | 12.00 (120)      | 18 |
|                                  | 14.00 (240)      | 19 |
|                                  | 18.00 (480)      | 20 |

- Experimenter: see sampling scheme.
- For making extra technical replicates: please just add a followup number to sample ID. e.g. making two technical replicates from following sample ID would result in following sample IDs:

1\_5\_17\_2      1\_5\_17\_2\_1  
                          1\_5\_17\_2\_2
